

AIQON: The Brazilian Cyber Hub

Bridging the Gap Between
Global Innovation and Local
Business Strategy

Curating the world's most disruptive cybersecurity technologies and delivering them with elite local support, financial tropicalization, and zero-friction operations.

The Innovation Gap in the Brazilian Market

The Skewed Market

While multinationals access global tech easily, the vast majority face barriers.

Financial Barriers

Dollar-denominated costs and complex international billing exclude companies with limited currency resilience.

Operational Complexity

Lack of local, Portuguese-speaking elite technical support for advanced tools like AppSec and SASE.

The 'Long Tail' Reality

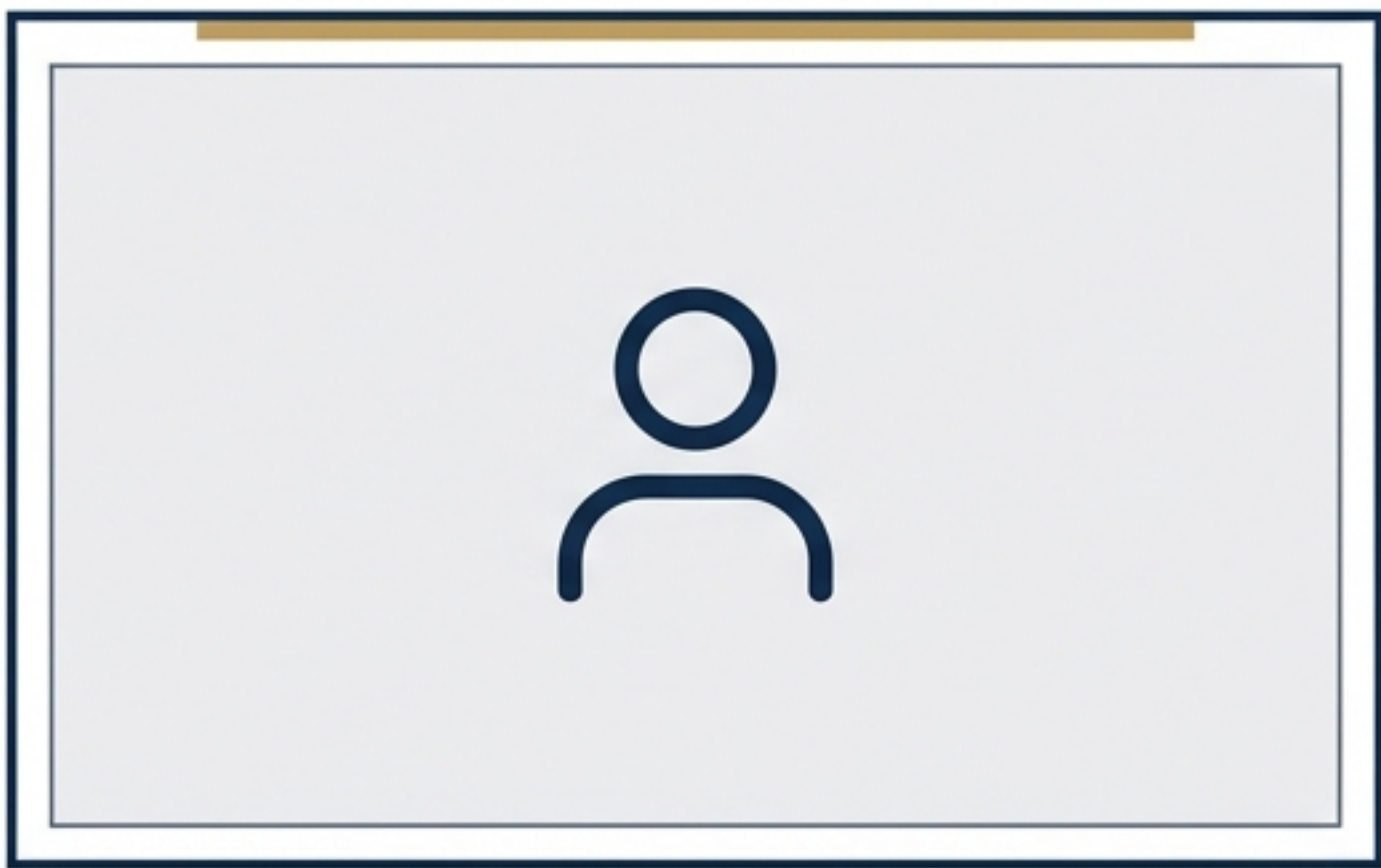

The market needs to democratize access to tools previously reserved for the corporate elite.

The Hub Solution: Curated, Tropicalized, and Supported

We don't just move licenses; we remove friction.

A Culture of Meritocracy and Continuous Education

Thiago Felipe

Founder & CEO

Philosophy: **"Education drives productivity."**

A culture built on meritocracy, process efficiency, and deep academic preparation.

Academic Background

Harvard Business School (OPM)

Columbia Business School

London Business School

Governance & Ethics

**ISO 27001
Certified**

Information Security
Management

**ISO 37001
Certified**

Anti-Bribery
Management Systems

One of the few players in the sector with dual ISO certification, signaling rigorous compliance.

01

Application Security & DevSecOps

Securing the software supply chain from the first line of code to the cloud.

Veracode

Application Risk Management

121M+ Software Flaws Fixed

- AI-driven remediation (Fix), SAST, DAST, Container Security.

Secure Code Warrior

Developer-Led Upskilling

Reduce introduced vulnerabilities by up to 53%

- Agile learning platform integrated directly into the IDE.

OX Security

Software Supply Chain Security

- Features 'VibeSec' and Pipeline Bill of Materials (PBOM) to secure AI-generated code.

02

API Security & Protection

Defending the backbone of modern connectivity against sophisticated abuse.

42Crunch

Developer-First API Security

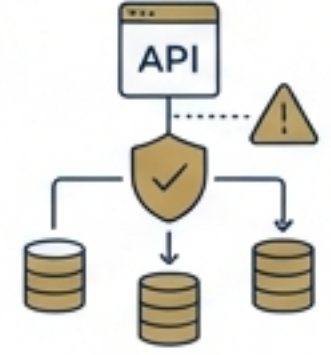

Trusted by over 2 million developers.

Automating security testing in CI/CD and shielding at runtime. Preparing for the “State of API Security 2026”.

Wallarm

Integrated App & API Security

Blocks 15M+ application/API attacks monthly.

Protecting against “Agentic AI” threats, API abuse, and bot attacks with real-time blocking.

03

Endpoint Resilience & Management

Visibility, control, and self-healing for the anywhere workforce.

Absolute Security (incl. Syxsense)

The only firmware-embedded resilience platform.

Embedded in 600M+ devices (undeletable).

- Application Persistence (self-healing agents) and Syxsense Cortex (automated vulnerability remediation).

Action1

Cloud-Native Patch Management.

99% Patch Success Rate.

- P2P update distribution, patching for third-party apps, effective without VPNs.

04

Identity & Data Governance

Securing the 'Who'
and the 'What' in a
hybrid environment.

Netwrix

Data Security that starts with Identity.

120+ Fortune 500 companies rely on their solutions.

- DSPM (Data Security Posture Management), Privileged Access Management (PAM), and Active Directory security.

Keepit

Independent Cloud Data Protection.

- Vendor-neutral cloud backup for SaaS (M365, Salesforce, Entra ID).

Blockchain-verified immutable storage with no sub-processors (critical for compliance).

05

Unified Operations & XDR

AI-driven automation to reduce alert fatigue and simplify management.

Cynet

The All-in-One Security Platform.

100% Protection & Detection Visibility (MITRE ATT&CK).

- CyOps (24/7 MDR), Auto-remediation of 90% of threats, unified XDR for lean teams.

ManageEngine

IT Management & Observability.

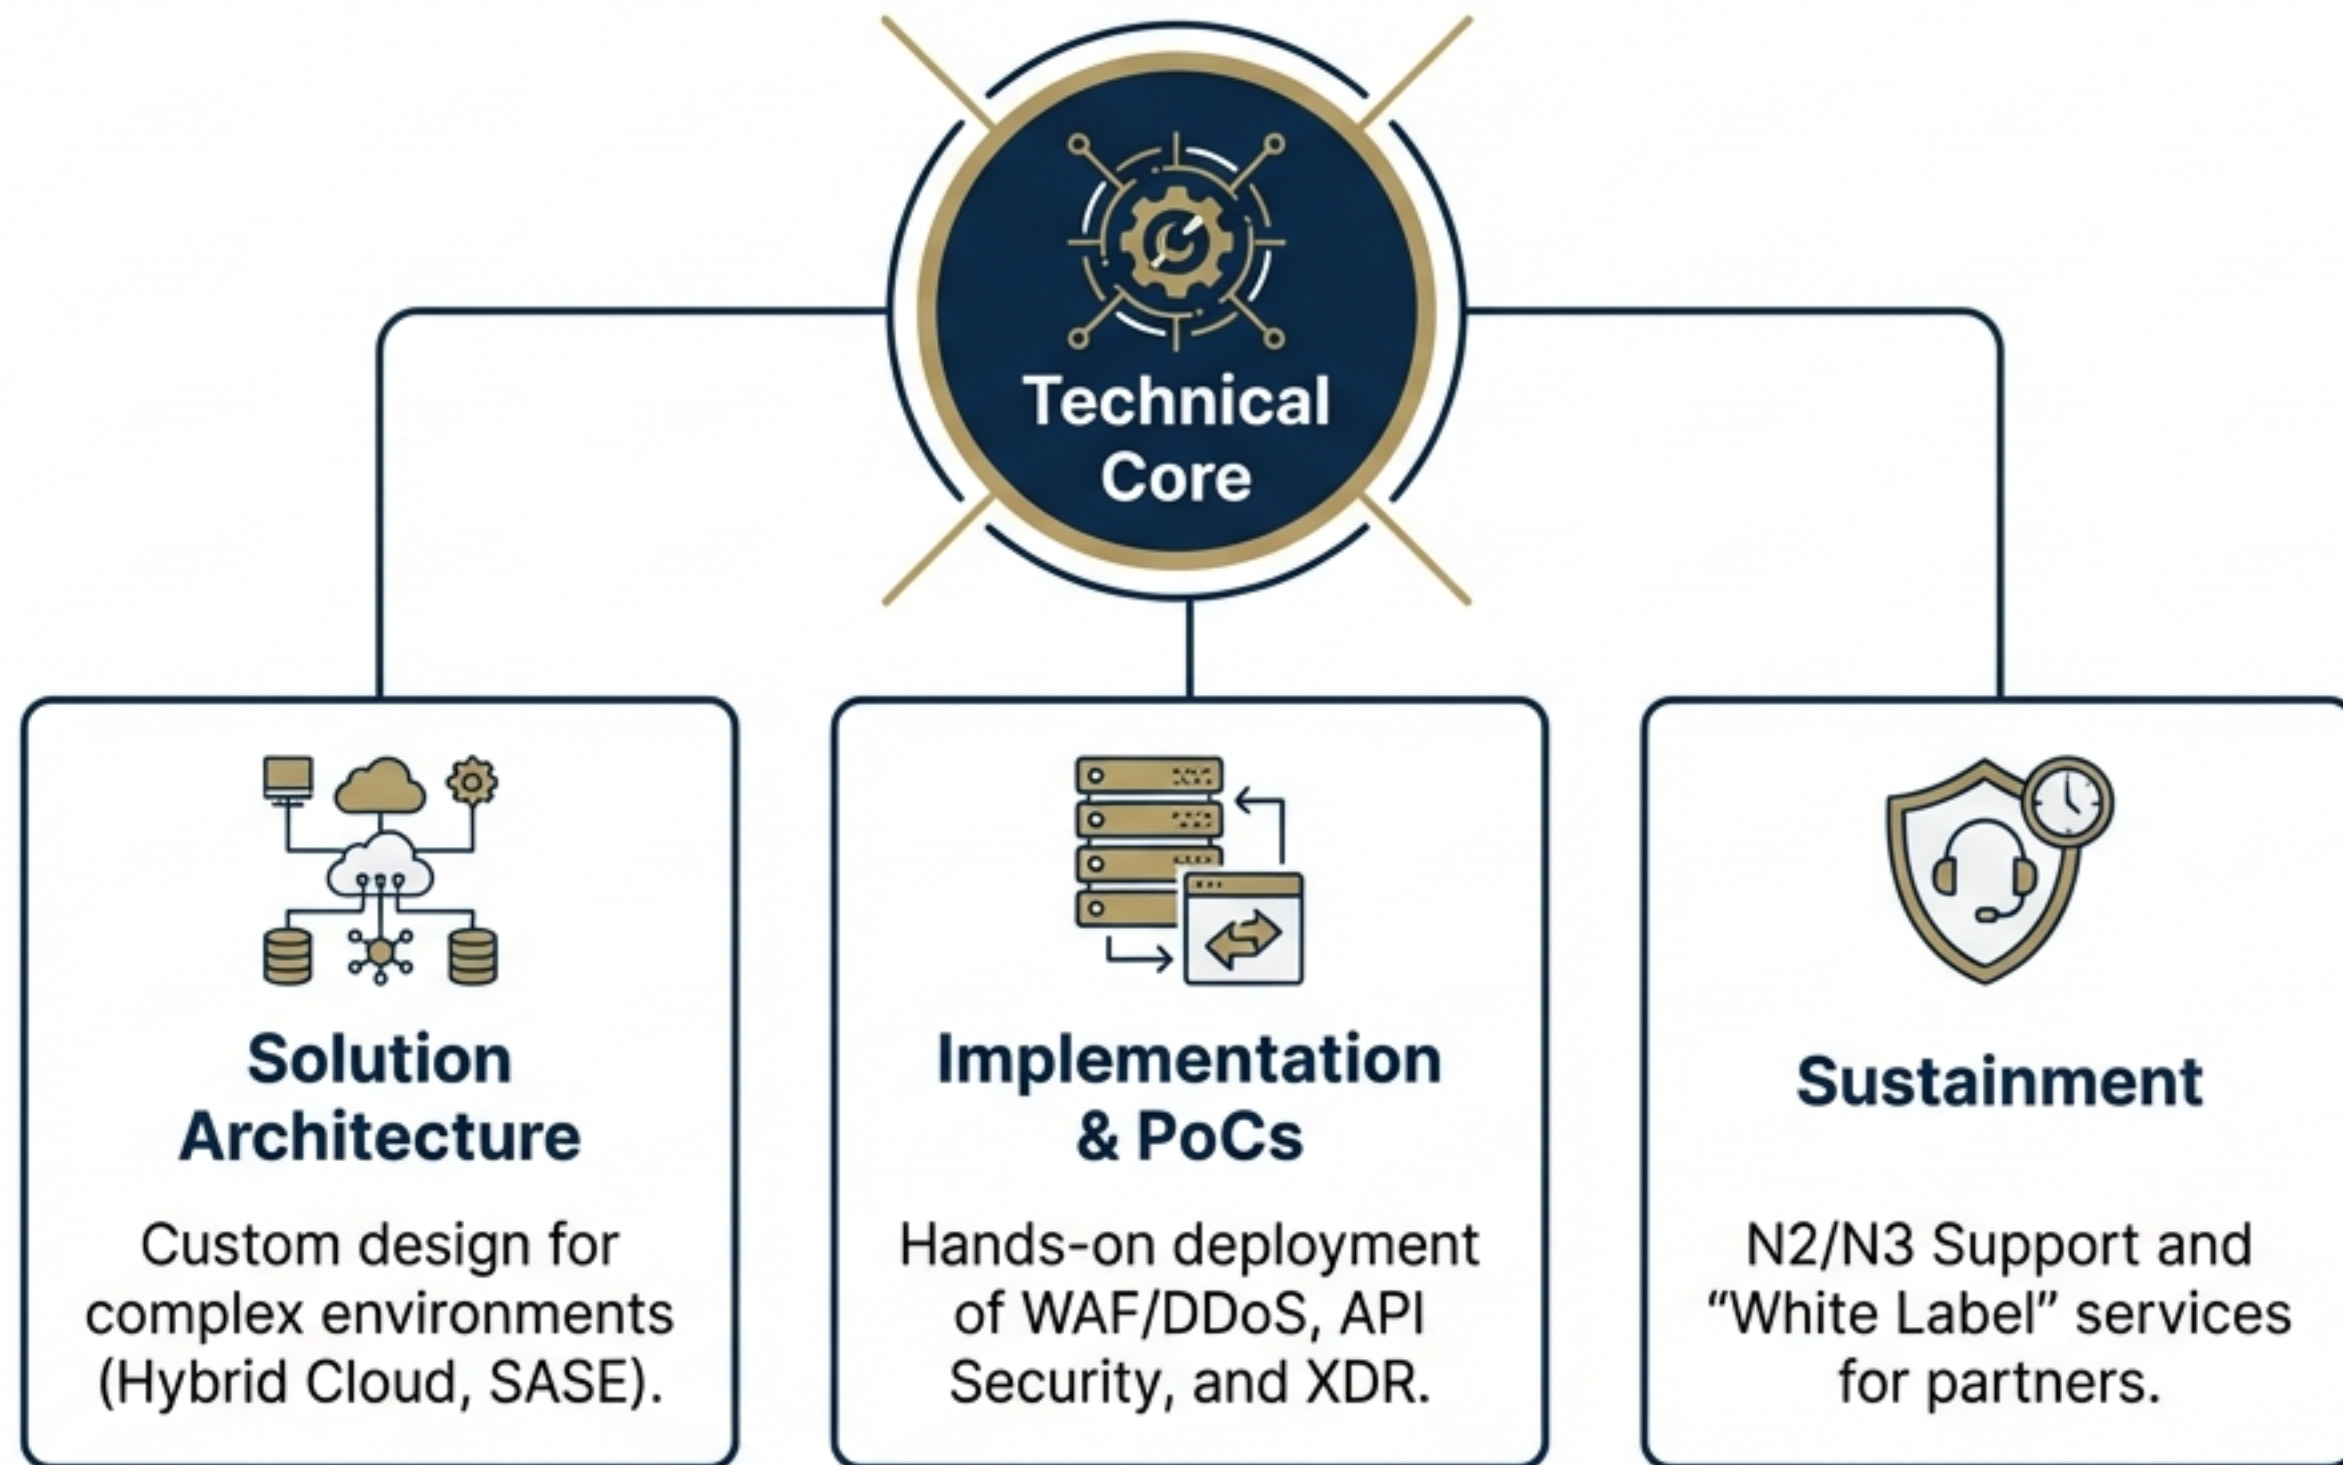

70K+ users on PitStop community.

- Comprehensive suite ranging from SIEM (Log360) to Endpoint Central and Service Desk.

Technical Excellence: Beyond Distribution

We operate as an elite technical extension of your team.

Engineering Caliber: Led by experts like **Anderson Leandrino** (20+ years experience). Deep proficiency in **SASE** (Netskope, Cloudflare), **Cloud Platforms** (AWS, Azure), and critical infrastructure.

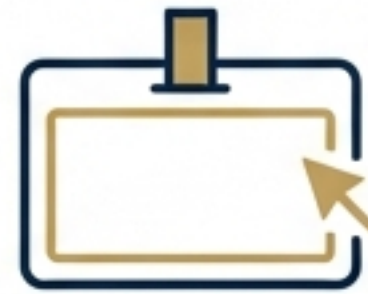

The Partner Program: Enabling the Channel

A structure designed to let partners focus on relationships while we handle the complexity.

Deal Protection

Strict registration rules to guarantee margin and confidentiality.

White-Label Services

AIQON engineers act as the partner's technical staff during deployments.

Marketing Support

Co-branded campaigns and lead generation.

Zero-Friction Operations

Simplified, nationalized billing eliminates import/export headaches.

Elevating the Market Through Knowledge

“Education is the foundation of productivity.”

Webinars & Training

Regular deep dives on topics like “Patch Compliance Desmistificado,” “LGPD,” and “Deep Learning in Cyber.”

Thought Leadership

Contributions to books like “A Arte de Empreender” and “A Arte de Inovar.”

ID Talk & Community

Active participation in the crypto/identity community to translate complex tech for C-Level decision-makers.

Why AIQON? The Strategic Advantage

Curated Innovation

Access to top-tier global vendors (Veracode, Absolute, 42Crunch) without the noise of the 'hype cycle'.

Tropicalized Business

Financial and legal models adapted specifically for Brazilian corporate reality.

Technical Elite

Implementation and support delivered by engineers with decades of experience.

Certified Governance

ISO 27001 (Security) & ISO 37001 (Anti-Bribery) certified, ensuring compliance and ethical partnership.

Vision 2026: The Future of Cyber Resilience

Preparing your business for the next wave of technological disruption.

1

Agentic AI Security

Protecting AI-driven coding assistants and autonomous agents (OX Security / Wallarm).

2

Cyber Resilience

Moving beyond “protection” to “recovery in minutes” (Absolute Rehydrate).

3

Continuous Compliance

Automating adherence to evolving standards like DORA and NIS2 (Keepit / Netwrix).

Innovation moves fast.
We ensure you don't get left behind.
